SUMMARY
Final-year Computer Science student focused on NLP and backend engineering. Built REST APIs and machine learning pip

EDUCATION
B.E. in Computer Science and Engineering
Example Institute of Technology, Chennai
2022 - 2026 | CGPA: 8.7/10

SKILLS
Languages: Python, Java, SQL, JS
Backend: FastAPI, Flask, REST APIs
AI/ML: Machine Learning, NLP, Scikit-learn, spaCy, Pandas, NumPy
Database: Postgres, MongoDB
Tools: Git, GitHub, Postman, Docker

EXPERIENCE
Software Engineering Intern - Acme Technologies Pvt. Ltd.
Jun 2025 - Aug 2025
- Built REST APIs with FastAPI and PostgreSQL that served 5,000 requests per day
- Reduced average response time by 30% by adding Redis caching
- Wrote unit tests with Pytest and automated checks using GitHub Actions

PROJECTS
Smart Notes Classifier | Python, scikit-learn
- Trained a text classification model on 12,000 labelled notes and reached 91% accuracy
- Used spaCy for tokenization and lemmatization before TF-IDF features

Campus Event Portal | React, Node.js, MongoDB
- Developed a full-stack portal used by 400 students to register for events
- Implemented JWT authentication and role-based access

CERTIFICATIONS
- Microsoft Azure AI Fundamentals (AI-900) - Microsoft, 2026
- Python for Everybody - Coursera, 2024

ACHIEVEMENTS
- Finalist, college hackathon 2025
- Secured a top 10 rank in an inter-college coding contest
